

KoskiShip

Koskisen's solution for ships

Koskisen's panel solutions for ships are always coated with a taint and odour free overlay which makes them an excellent cladding material for fishing vessels or vessels carrying foodstuffs. The materials used do not corrode metal parts or fittings.

The ABS coated birch plywood boards are durable, hard wearing and hygienic.

Size: 600x2400mm

Colour: glossy white

Thickness: 11mm and 14mm, other thicknesses are available upon request

Working temperature*: from -30° to +90°C, Softening point +90°C,

Thermoforming +120°C

Certificate: TAK000004H, certified by Det Norske Veritas (DNV)

*marked values are given by coating manufacturer and can't be guaranteed by Koskisen

The boards are pre machined making them easy to install and hidden fixings ensure no visible screws. This gives an continuous smooth and water-proof surface.
